# Colourful as life, handy and light—

Like to get away from the noise and bustle of everyday city life? ... Be by yourself in the great outdoors? No need to leave the pleasure of TV viewing back home. Go camping out. Go to the beach. Go hiking in the woods ... or take a weekend trip to the mountains. It goes where you go. Take along the new ready-to-go-anywhere "My Way" TV — the CX-610 from JVC.

# -ready-to-go-anywhere "My Way" TV

## Four-way power supply flexibility

The compact CX-610 ready-to-go colour TV is as flexible and versatile as any seasoned traveller. This means that its design allows it to make the best of most any situation. With its 4-way power supply flexibility, feel at ease anywhere your heart chooses to wander. For anywhere DC operation you have the option of regular R-20-size batteries or rechargeable battery pack. Also for outdoor operation it can run off car or boat battery via an optional car cord. And of course, when indoors, the CX-610 can be operated directly from household AC to save battery power.

## PAL/SECAM TV reception

The colour system automatically switches between PAL -B, G or I system and SECAM -B, G, D, K or K1 system (CCIR continental and OIRT standards) and all corresponding sound IF frequencies can be selected.

## Sharp, vivid colour pictures

Watching TV in colour is preferred by almost everyone these days, but to have a unit of such small proportions is a rarity indeed. Quality colour images are the rule with the CX-610 "My Way" portable TV thanks to the newly developed precision in-line picture tube. More supporting features on this model include a contactless electronic tuner, a highly sensitive telescopic swivel antenna, automatic fine tuning control, etc. And to further en-

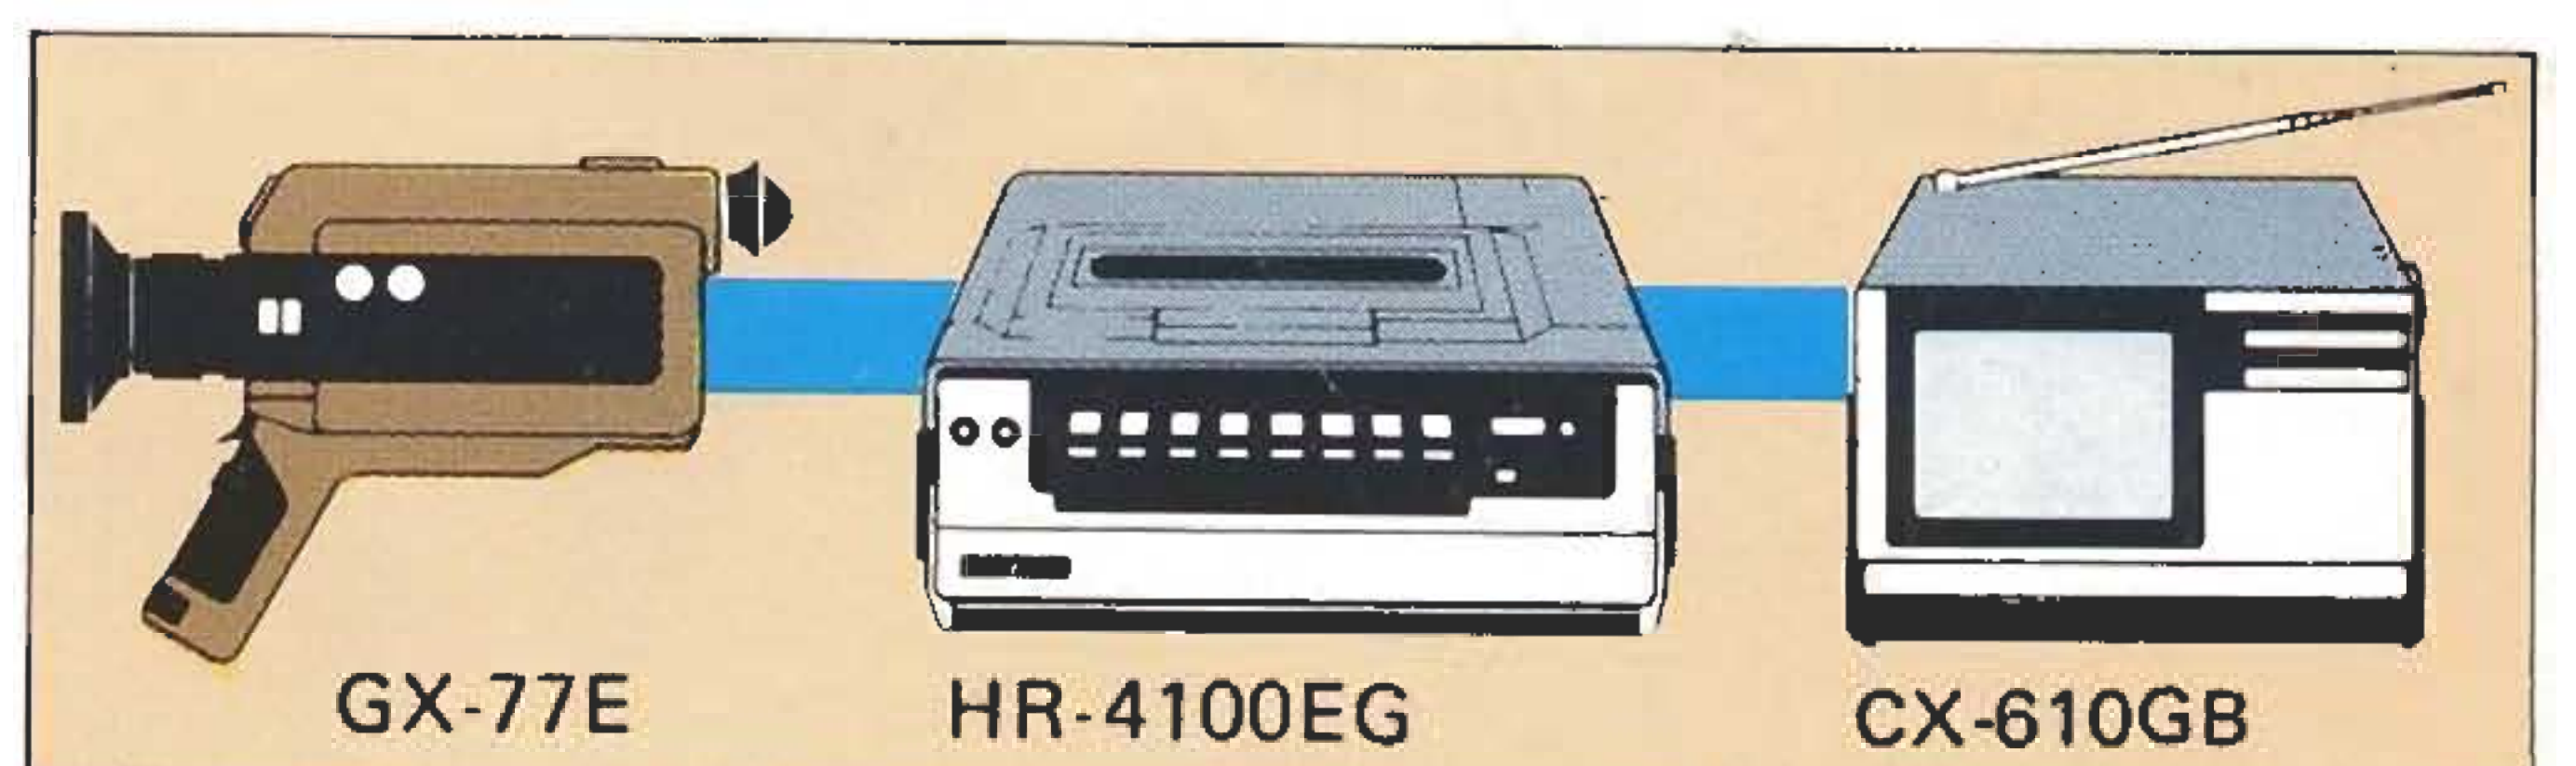

hance viewability of the picture, the screen is designed in a flat-surface profile. All this adds up to more viewing pleasure in living colour.

## Truly a "Video Age" unit

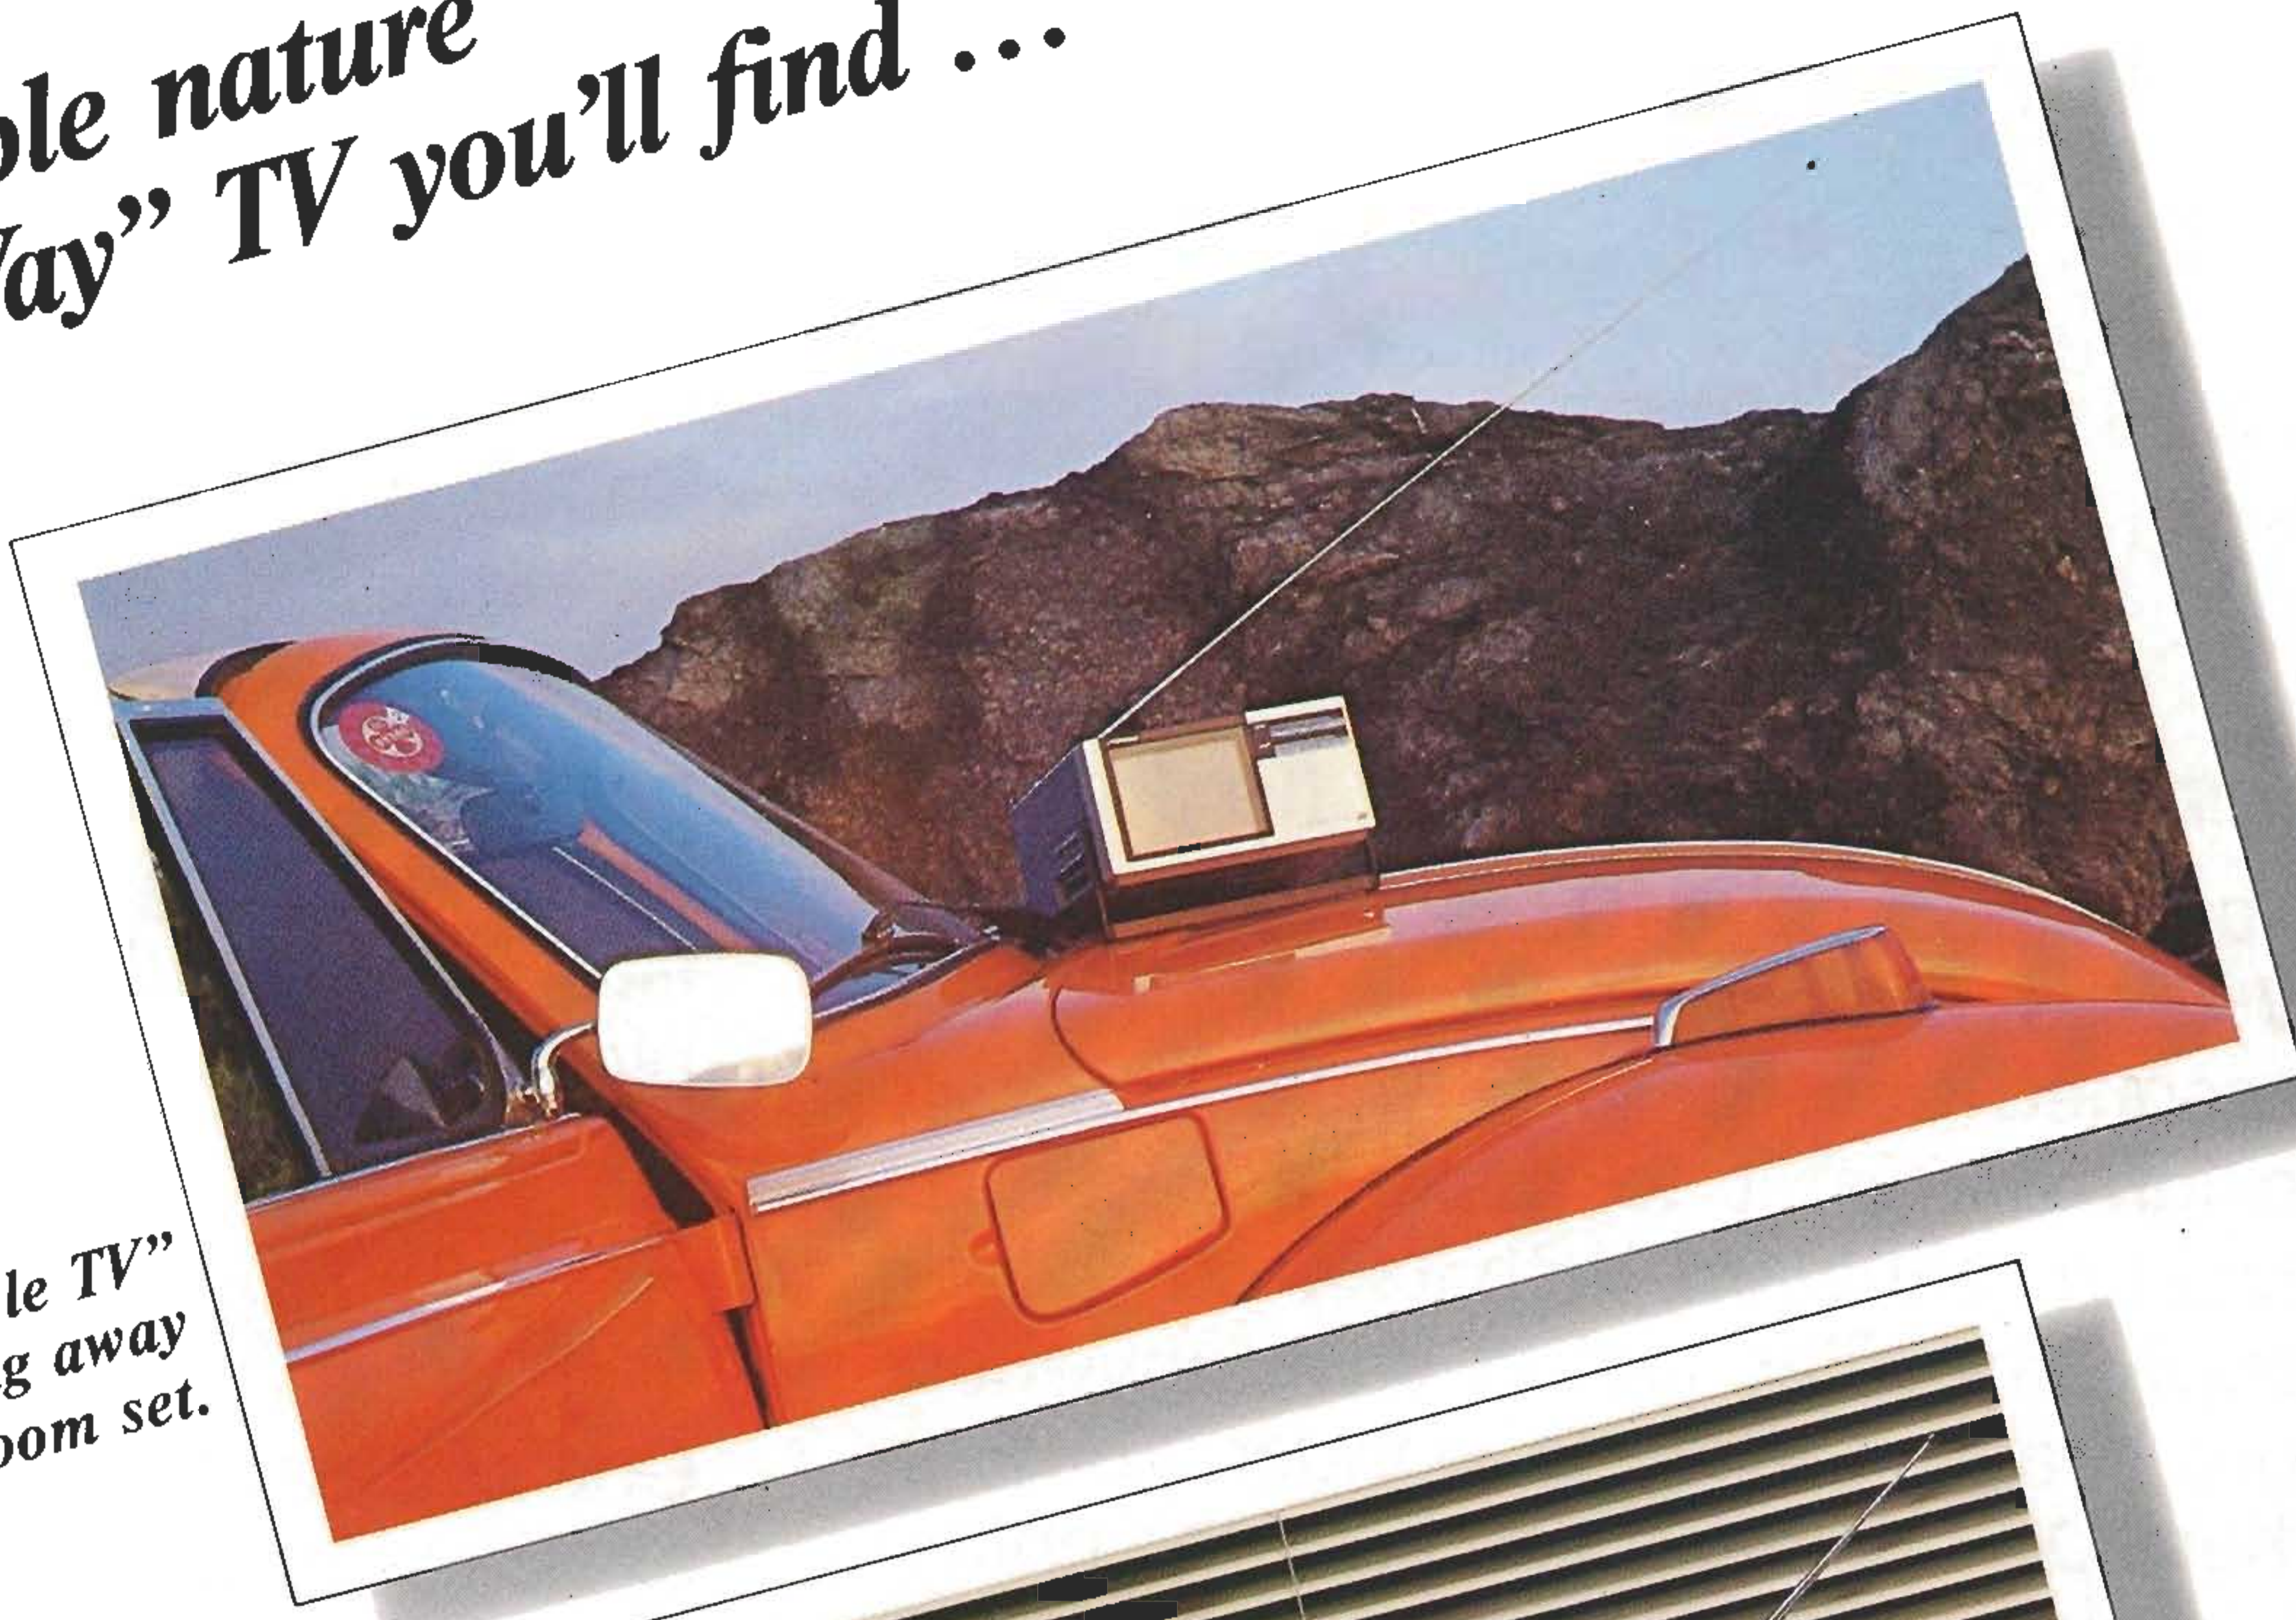

One of the major aspects of the new and exciting Video Age is being able to make your own video movies for TV viewing. The "CX-610" carries video terminals which allow it to be used as a video monitor in combination with a colour video camera and recorder for making on-the-spot checks of colour and picture composition. Furthermore, in combination with a portable video recorder, the CX-610 can be used to record off-air TV programs, even out of doors.

<b>Video external input</b>	: 1 Vp-p 75 ohms
<b>Audio external input</b>	: 0 dBm high impedance
<b>Video TV output</b>	: 0.8 Vp-p 75 ohms
<b>Audio TV output</b>	: -18 dBm low impedance

**From the likable nature  
of the "My Way" TV you'll find ...**

**A "companionable TV"  
that makes you forget being away  
from the living room set.**

**A "manageable TV"  
that introduces you to convenient,  
personalized viewing.**

**A "matchless TV" that just  
matches your do-it-yourself  
video hobby.**
